INTRODUCTION

It is unlikely that whoever first formulated the rules of chess on the banks of the Ganges long ago foresaw the emergence of chess problems as an absorbing pastime in their own right. However, in some ways chess problems have exercised an even wider fascination than the game itself, appealing as they do not only to chess players but also to millions for whom the competitive game holds less attraction. Following hard on the heels of the previous four books in this popular series from Sterling Publishing - *200 Classic Chess Puzzles* (1993), *200 Challenging Chess Puzzles* (1995), *200 Demanding Chess Puzzles* (1996), *200 Intriguing Chess Puzzles* (1996) and - the present volume, *200 Perplexing Chess Puzzles* (1997), is a collection of some more of the most absorbing chess problems ever devised.

The object in chess, of course, is to trap, or checkmate, the opponent's King into a check from which it cannot escape, thus bringing the game to a victorious conclusion. *200 Perplexing Chess Puzzles* is a collection of gripping, grueling, and teeth-grating end games in which a checkmate, or mate, is required in two, three, four, or more moves. Shown the illustration of a board with chess pieces in fixed positions, it's up to you to determine how to take the King in a given number of moves. What's more, if you're to solve the puzzle successfully, you have to take the part of both players, seeing the game from the point of view of both Black and White. In these riveting chess puzzles, you'll be forced to play the end game both aggressively and defensively, keeping the pieces of both opponents concentrated in logical cooperation until you can say with certainty, "the King is dead," the literal meaning of the Persian *shah mat*, from which the term "checkmate" derives.

200 Perplexing Chess Puzzles is intended for both the player with only an elementary understanding of the game and for the more advanced player who wishes to test his skill. Since the end game is the most important phase of chess, and a good end-game player can vanquish the opening or middle-game specialist, concentrating on these brilliant puzzles will not only provide hours of brain-teasing fun, but may help you to be a better end-game player and enable you to enjoy the challenging endings and therefore chess to the full. Included in the puzzles are Pawn endings, Queen endings, Queen and Pawn endings, Rook and Pawn endings, and minor piece endings. *200 Perplexing Chess Puzzles*, all culled from award-winning chess problems from the past, forces you to play end games that are full of excitement, color, brilliance, and subtlety. And, if you're stumped, or even if you're not, the solutions appear in the back of the book.

A word or two about these solutions is in order. First, the shorthand used to describe chess play in these pages is a modified form of standard Descriptive (or English) Notation, with a dash (—) indicating moves (e.g. P—K4) and an *x* indicating captures (e.g. Q x B). Such abbreviations as *ch*, *db ch*, and *dis ch* (check, double check, and discovers [reveals] check) are obvious, while the beginner may, perhaps, need to be reminded that *e.p.* stands for a capture *en passant*.

Second, since many of the puzzles allow for *more* than one solution, alternative solutions — frequently more than one — are offered. These alternative solutions and moves are indicated by asterisks (*, **, or ***).

Finally, several of the puzzles are not only tricky in their own right, but tricky by design — that is, while the correct solution might call for, say, four moves, you might in fact give mate in only three. The challenge lies in finding the *stipulated* number of moves, even if there is an easier way! With this caveat in mind, enjoy these 200 classic chess challenges to the full.

4. P—Q5	P x P
5. B—QB3, etc.	

PUZZLE No. 17

WHITE	BLACK
1. Q—KB6	Q—KR7*
2. Q x R at B5	Q or B checks
3. P—Kt5 (ch)	Q or B x P (ch)
4. Q x Q or B. Mate	

*Black cannot take the Q, either on its first or second move, without being immediately mated by the Kt. If Black plays 1. Q—K7, or 1. Q—KR7, White checks with its Q at QB3, and mates in two more moves.

PUZZLE NO. 18

WHITE	BLACK
1. R—K4 (ch)	K—B6
2. Kt—KKt5 (ch)	K x Kt
3. Kt—KR3 (ch)	K—B6
4. B—QB6	B—QR4 or B—B5 (ch) *
5. R—QKt4 or R x B (dis ch)	

* If Back plays Kt—QB5 (ch) White replies with R x Kt (mate). If Black plays Kt—K6, then R—KB4 (mate). Finally, if Black plays Kt or R—KB5, then R x Kt or R (mate)
